

As the only Community Health Center-owned Healthcare IT developer, our first-hand CHC operations exposure and experience gives Chorus a unique insight into CHC information needs and an advantage when it comes to developing solutions.

Coupled with our commitment to continuous product innovation through research and development, it's enabled us to create new Chorus Practice Management V7.0, a system designed specifically to help healthcare organizations achieve superior information organization.

KEY FEATURES:

A New Architecture For A New System

Chorus Practice Management V7.0 is new from the ground up, built on the Microsoft.Net platform for increased speed, performance and stability.

Easy Single Screen Billing

No need to open files in separate windows! Chorus's new PMS V7.0 Billing Window allows you to prepare all required reports on a single screen.

- As you open files, screens cascade to keep clearly labeled titles always in view
- A full toolbar is always accessible
- Function key placement is consistent

Drag & Drop Data Entry

V7.0's new customizable "Point & Click!" electronic claims interface saves hours spent entering information!

Up to 90% Initial Claims Acceptance

Scrutinize your claims - just as payors do - to ensure they're error free before submittal. Speed up payments! Reduce rejections by up to 90%! V7.0's new on-line Claims Editor saves hours of time and thousands of dollars correcting errors and resubmitting claims.

Fast, Accurate Reporting

Chorus's new PMS V7.0 includes Cognos ReportNet, the industry's leading report writer plus a battery of fully formatted UDS reports for end-of-year BPHC reporting. New GAAP-based Ledger Table functionality lets you design and run consistent custom reports.

Convenient, Secure System Close

The convenient one-screen PMS V7.0 closing process allows you to close your books daily, monthly or annually. Lets you keep your data secure.

Aesthetics & Ergonomics For Greater Ease of Use

The Chorus PMS V7.0 developers know "the devils in the details" so they designed with user ergonomics in mind. Modify editing rules; view and edit patient statements; add custom messages; select or delete statements before printing or mailing; and more:

- Siding Fee Scale
- Flexible Billing Tools
- Electronic Statement Processing
- Enhanced Search Capability including Partial Search and Multiple Search Filters
- Extended Patient Record Search, e.g., DOB, phone number, etc.
- Dynamic Required Fields o Missing Required Field Notification
- Column Sorting Within Displays
- Grid Data Categorization o Meaningful Icons
- Support for California Billing Programs
